

### **Calvary Church project**

Note the dates: Building Permit issued October 27th and Final Inspection December 28th. That record of swift execution is most excellent and a credit to our building team, particularly considering the issues uncovered along the way.

A big thank you to our entire team; all participated and assisted. A special thanks to Chad Vogt of E2, Karl Bagwell and Wes Hinds of Yankee Remodeler and Mike Rogers of Southeast Electric for their timely response in dealing with the existing structure and changing light specifications while solidly remaining on budget and on schedule.

And let us remember Tom and Candy Sanford and their family who made all this possible through their generosity and dedication to the Church and its music program.

Kudos to All!

Best Regards,  
Bill Rutherford
